

Usage Instructions

1. **Connect to Power:** Plug the USB cable into the warming rod and connect it to a USB power source, such as a computer or USB wall adapter.
2. **Insert into Sleeve:** Place the warming rod into the canal of your Fleshlight sleeve. Ensure it is positioned centrally for even heat distribution.
3. **Heating Time:** Allow the rod to heat the sleeve for approximately 5 to 10 minutes. The device is designed to reach a safe temperature that mimics body heat.
4. **Ready to Use:** Once warmed, remove the rod and enjoy your Fleshlight sleeve as desired.

Safety Guidelines:

- **Automatic Shut-Off:** The warming rod features an automatic shut-off mechanism to prevent overheating.
- **Water Resistance:** While the device is water-resistant, do not submerge it in water. Clean with a damp cloth if necessary.
- **Usage Duration:** Do not leave the warming rod plugged in for more than 24 hours continuously.
- **Storage:** Store the device in a cool, dry place when not in use.
