

Product Specifications

Size (D x W x H mm): 80 x 80 x 193
Insertion Length Approx. (mm): 150
Insertion Width Approx. (mm): 45
Weight (g): 434

Other specs:

Reusable

Materials:

Body: ABS, PC, POM, Silicone, Elastomer

With proper washing and care, the AERO is reusable. Please note that product longevity may vary in accordance with methods and strength of use, lubricant choice, cleaning and storage methods, and overall maintenance.

Washing instructions:

- 1) Remove the Elastomer from the Outer Case and wash it.
- 2) After use, thoroughly wash out the lotion with cold or lukewarm water and then wipe off remaining moisture with a dry towel.
- 3) Dry the Elastomer without turning it inside out.
- 4) A drying stand can be made by pulling the Cap Stand all the way up and then turning it clockwise until it clicks into place. Place the Elastomer on the Stand and dry it thoroughly in a well-ventilated area.

Warnings:

- Avoid using hot water of 50°C/ 122°F or higher, as it may damage the elastomer (the soft transparent part).
- While body soap and other such products may be used, avoid using highly acidic/alkaline cleansers. Such cleansers may damage the elastomer.
- Please ensure the product is completely clean and dry before storing to help avoid mould and other build-up.
- Store the Product in a cool and dark place, avoiding direct sunlight and high temperatures and humidity.
- Please note that while the material of the interior (TPE) should be compatible with other water-based lubricants, we cannot be held responsible for any damage that may occur from third-party lubricants. Oils and silicone-based lubricants should not be used, as these can damage the material.
