
HOW TO USE

A patch test is needed on the area before use. Comes with application spatula.

- 1) Use the applicator to evenly apply intimate hair removal cream onto dry skin ensuring all the hair you want to remove is covered.
- 2) Wait for 1 minute before showering. Once in the shower avoid putting the cream directly in the stream of water for 2 minutes. It's normal for a bit of cream to wash off.
- 3) After the 2 minutes are up use a sponge, cloth or loofah to gently remove a small test area of cream. If hair comes away easily, massage in a firm, circular motion to remove the rest. If your hair is more stubborn, leave cream for up to 3 more minutes – but no longer.
- 4) Rinse skin thoroughly with water to remove cream completely and then dry off.
- 5) Say hello to a silky smooth undercarriage.

-
- For external use only.
 - Keep out of reach of children.
 - Avoid contact with eyes. If contact occurs, rinse thoroughly with clean water. Seek medical advice if irritation persists.
 - **Allergy notice:** Check the full ingredient list before use and perform a patch test on a small area of skin prior to first application. Do not use if you are allergic or sensitive to any of the listed ingredients.
 - If redness, burning, or irritation occurs, discontinue use immediately.
 - Store in a cool, dry place, away from direct sunlight and heat. Keep the container tightly closed when not in use.
 - Use within the 'Period After Opening' (PAO symbol) or by the 'Best Before' date shown on the packaging.
-
