Unite Sensory Dilator Kit

It is important to slowly introduce your body to penetration if you are experiencing any intimate discomfort, tightness, or pain issues. The Unite sensory silicone dilators are designed to guide you into a comfortable onward Journey experience.

There are various causes and conditions for discomfort and a painful sex experience, post pregnancy, throughout menopause, perimenopause, and intercourse after menopause. The vagina does not just get drier in menopause; it can get narrower, shorter, and less flexible. All of these can contribute to pain during sex.

Dilators work by gradually improving the flexibility of the vagina and the strength of pelvic muscles so that penetration becomes more comfortable.

With time, and correct use women may be able to increase the width and depth they are able to tolerate and restore some elasticity.

By choosing the right size for you, and slowly increasing the size, from the six options, you can progress at your own pace and in your own time.

Unite Dilators are made from velvet touch body safe silicone with sensory nodules to ease penetration, to stimulate, massage and relax the sensitive internal fascia.

For women who are experiencing intimate related pain issues it is important to start with the smallest or most comfortable starting size for you, from the six size options, to help your body adjust to penetration.

Relaxation and comfort are key, so do make sure that you are allowing yourself time and a quiet space to understand your body's needs and reactions. Using an intimate moisturiser or water based lubricant helps to ensure ease of insertion.

Specifications

- Ergonomically designed.
- Variant sizing for ease and comfort.
- Peach soft Body safe silicone
- Sensory intimate Fascia massage nodules
- Use with water-based lubricants

choose the right size for you,
and slowly increase the size,
from the six size options.
